THE CARE & KEEPING OF *Cuddle Jones*

Like all slow-rise squishy friends, Cuddle Jones comes with a few things you need to know and understand:

1. Cuddle Jones squishies are for people **6 years of age and older**.
2. They are not food. **Do not eat!**
3. They are very flammable. **Keep away from fire!**
4. Your slow-rise squishy friends are delicate. **Do not twist, pull, or tear** as this will ruin them.
5. Cuddle Jones needs space to breathe. **Do not leave your squishies in a compressed, squished, or flattened situation.** They may not rise again. They could also be permanently wrinkled or creased.
6. Over time, Cuddle Jones may lose color and/or scent. This is typical of all squishy friends.
7. Each Cuddle Jones is made from a mold and is hand trimmed with scissors. This results in variations, slight divots, and minor rough edges along the seams. This is normal and not a defect.
8. Subtle variations in color and scent are to be expected. Our squishy friends are painted with stencils, then hand detailed. Each Cuddle Jones is a unique and individual work of art.
